Community Connect

Defining the product

For whom and why

For community members in rural areas

We are creating a product that brings communities together through local events.

By bringing the community together through events we are increasing communication between community members, nurture cultural customs and traditions.

What we learnt

- Crash course in tech stack
- AGILE approach
 - Capitalisation of strengths/weaknesses
- Communication, sharing ideas, no lone hackers
- Importance of morale
- Good guidance leads to good product

What would we do differently

- Focus on an minimum viable product from the beginning
- Manage the product owner's expectations
- Practice on making stories INVEST
- Longer inception sessions
